DETAILED ACTION

Election/Restrictions

Claims 1, 7-9, 15 and 16 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected subject matter, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 20 June 2007.

Information Disclosure Statement

The Information Disclosure Statements filed 14 December 2006 and 01 September 2006 have been made of record.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 2-6 and 10-14 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. The specific placement, connection and use of the discrete components is critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). The claim language states "placing discrete components near an edge of the metallized area such that electric current due to

Art Unit: 2618

scattering electro-magnetic waves present on the metallized area encounters higher impedances due to the discrete components near the edge of the metallized area." This embodiment is apparently best described in the Specification in paragraph 0018 with respect to figure 5. However, neither the Specification or figure identifies what consists of an edge of the metallized area, how the component is placed near an edge of the metallized area or how the discrete component, in view of its placement/ connection to the edge, presents a higher impedance to the current due to the EM waves.
